Objective

To work with a professional team in a highly challenging and creative environment, where I can achieve both personal and professional growth. Willing to work as a key person in a challenging and creative environment by changing my career path.

Competency Matrix

Training and support	Customer Support	Team Management
Pre-sales demo and benchmarking	Reverse engineering	Troubleshoot of 3D Scanners

Professional Experience

1. Application Engineer, Promedia Systems, Dubai.

Period : April 2019 – Till date

Role – Application Engineer.

Responsibilities:

- Handing of projects on the Reverse engineering and Metrology service sector.
- Suggestion of right solutions to the customers
- Documentation of projects from initiating to delivery of goods / services
- Providing pre-sales demo and benchmarking.
- Execution of the post-sales support and training at the customer place
- Provide internal training to the new trainees

Hardware and Software handled

- Romer absolute with scanner (Metrology ARM Scanner)
- Geomagic Design X (Reverse Engineering) / Control X (3D Metrology) / Wrap (3D Scanning & Sculpture Design)
- CATIA V5 (Part Design, Surface Design, Reverse Engineering)

Trainings Handled / Projects Handled

- 2-day Training on CATIA Reverse Engineering.
- Reverse engineering (Physical part – 3D scan – Design – Manufacture drawing – Final Inspection) of part from production line in one of the MNC's in UAE.
- Apart from the above, done a few projects like 3D scan to CAD conversion and inspection for small scale companies (automobile remodeling, pump industries, armored industries, etc.,)

Summary:

It is a challenging role, to be a part of team is tasked with handling the customized projects based in the customer need. Every day was a learning phase, as each customer need different products and different solutions. Have been learning a lot apart from just the metrology 3D Scanning and reverse engineering.

2. Team Lead, Precise 3D Metrology and Design Solutions Pvt Ltd, Chennai, India.

Period : June 2016 – July 2018

Role – Team Lead (Design & Metrology Services).

Responsibilities:

- Providing benchmark support to sales team by completing customer project on the scanner and software
- Intake of customer requirement with full knowledge and convey that to the design engineers
- Provide internal training to the new trainees

Hardware and Software handled

- Perceptron Scanner with Romer Arm (Metrology ARM Scanner)
- Geomagic capture Scanner (Desktop Projection scanner)
- eviXscan HD Quadro Scanner (Metrology Projection scanner)
- Einscan Pro + (Sculptor Handheld - Shinning 3D)
- FreeScan X7 (Metrology Handheld - Shinning 3D)
- Geomagic Design X / Control X / Wrap

Trainings Handled / Projects Handled

- Caresoft Global, Pollachi
- Flowserve, Chennai
- Sathyam Ventures, Chennai
- Bharat Dynamics Limited, Hyderabad
- Royal Enfield motors, Chennai
- Lead a team that did reverse engineering (Scan to CAD) of complete cars.

Summary:

Apart from the above said roles and responsibilities, it was a learning phase throughout the 2-year period, since it was my first professional experience after the master's degree. This taught me lot of things and the major learning factors were the customer handling experience and the industrial method of training to engineers.

Software Skills

- Solidworks
- Geomagic Design X, Control X and Wrap
- CATIA V5 (Part Design, Surface Design, Reverse Engineering)
- MS Office

Education

- Completed Master of Engineering, specialized in Engineering Design at Kongu Engineering College, Perundurai, Erode with 8.1 CGPA
- Completed Bachelor of engineer, specialized in Mechanical Engineering at TRP Engineering College, Trichy with 7.39 CGPA.

Languages Known

Fluency in English and Tamil (Read, Write & Speak)

I confirm that the above information is true to the best of my knowledge.
